For Immediate Release

MTN Products was awarded the NAMA Innovations Award in the Coffee & Water Equipment category at the NAMA One Show in Chicago. The award was presented to MTN for the Genesis CT™ Point of Use counter top water cooler for its innovative design and newly introduced cooler technologies. The Genesis CT™ cooler is the first self-sanitizing water cooler to have both the reservoir and the waterways sanitized automatically, using ozone sanitization technology. The Genesis CT™ can accommodate most single cartridge filtration systems inside the cooler.

The unique look and operating features of the Genesis CT™ are new to water cooler industry and incorporate several new patent pending technologies, including Accu-Temp, Stay Cool, and i-Boil. The SIP Enhanced™ technology re-circulates ozonated water throughout the reservoir and waterways. More information is available on this unique award winning product at www.mtnproducts.com
