

TOP 10 TIPS

FOR SAVING WATER

Outlined below is a 10 point plan helping save water and protect the environment.

- 1** Install water-saving shower-heads and try to limit your showers to 4 minutes.

- 2** Use full loads in your dishwasher and washing machine, use an 'Eco' setting when possible.

- 3** Do not use your toilet as a place to dispose of rubbish such as used face clothes or cigarette butts etc - use the bin.

- 4** Check and repair all possible leaks, from the toilet to the taps to pipes.

- 5** Install a dual-flush toilet.

- 6** Do not leave water running for:

Brushing your teeth

Shaving (fill the sink)

Washing dishes (fill the sink)

- 7** Water the garden or other plants around the home at times of least evaporation such as early in the morning and late in the evening.

- 8** Install a collection tank for the eve-shoots of your home. This can be used for toilet water or gardening.

- 9** Do not wait for the tap to run to get cooler water, keep some water refrigerated instead.

- 10** Use buckets for cleaning floors, windows and cars.
